

A SNAPSHOT RECORD OF THE PATIENTS' TOTAL WAITING TIMES IN ACCIDENT AND EMERGENCY

The waiting time for patients in A & E department is made up of three elements:

- Waiting to see the doctor in the first place (not recorded by the Department of Health)
- Waiting for tests and assessment to be carried out (not recorded by the Department of Health)
- Waiting to go onto the ward after the doctor has decided the patient needs to be admitted to hospital (recorded by the Department of Health and published annually)

Only Community Health Councils through their monthly Casualty Watch snapshot, record and publish the patients' total wait in Accident and Emergency Departments.

Elizabeth Manero
CHAIR – LONDON HEALTH LINK

To: *All Participating CHCs and other Colleagues concerned with Quality of Emergency Services*

Subject: *Casualty Watch for the 30th April 2001*

From: *Mary Arayo, Casualty Watch Co-ordinator*

Royal Surrey County Hospital

South West Surrey CHC reported that the Accident and Emergency Department was extremely busy and at one point almost 60 patients were seen. The hospital has been on red alert for the past 6 days and all endoscopy and short stay wards are occupied.

Northwick Park Hospital

Joe Grenfell from Harrow CHC reported that the Accident and Emergency Department had a very bad day. Apparently the whole weekend was difficult due to a very serious bed shortage. Furthermore, it appeared that the situation was equally bad at Northwick Park sister hospital, Central Middlesex and in all neighbouring hospitals.

North Middlesex Hospital

Casualty Watch visitors from Haringey CHC reported that the Accident and Emergency Department was not so congested but some beds were closed. The Department was full because some patients were staying longer than required, however, the staff were both caring and committed.

Hammersmith Hospital

Amanda Morris from Hammersmith and Fulham CHC commented that the department was very busy. There was no receptionist and the locum doctor on duty was not doing the computer inputting.

East Surrey Hospital

Sally Herrtage and Sally Moran from East Surrey CHC reported that the department was exceedingly busy and were told that it had been even worse on the 29th April 2001. Presently 18 beds in the hospital were occupied by patients who should have been discharged but are still waiting for social services assistance.

Barnet Hospital

Janet Friend and Ruth Rees from Barnet CHC reported that the Accident and Emergency Department was very busy, but appeared calm with plenty of doctors and other staff on duty.

Ashford Hospital

David Revie from North West Surrey CHC noted that the indicated waiting time to be treated was 3 to 4 hours. The number of patients seen lying on trolleys in public areas and corridors was 1. The Medical Assessment Unit was full and blocked and unable to accept incoming patients. The "Surrey Emergency Capacity Management" screen on the monitor showed Ashford Hospital at 110% of calculated quota, and its sister hospital, St Peters, at 100% of calculated quota. Ambulances are being diverted to St Peters from hospitals further south.

Selly Oak Birmingham Hospital

Casualty Watch visitors from South Birmingham CHC commented on a long backlog for admissions. One patient who arrived at 02:15 was only admitted shortly before the arrival of Casualty Watch observer.
