

## **A SNAPSHOT RECORD OF THE PATIENTS' TOTAL WAITING TIMES IN ACCIDENT AND EMERGENCY**

The waiting time for patients in A & E department is made up of three elements:

1. Waiting to see the doctor in the first place.
2. Waiting for tests and assessment to be carried out for diagnosis
3. Waiting to go onto the ward after the doctor has decided the patient needs to be admitted to hospital.

Casualty Watch is a monthly snapshot of the total time spent by patients in A & E. The official data published by the Department of Health currently relates only to the third waiting period – the number of trolley waits over 12 hours. This data is used as one of the parameters to award Star Ratings to NHS Trusts. CHCs have long felt that the total wait for patients needs to be recorded. Unless the real experience of patients is used to judge the performance of the NHS, it is difficult to make sure improvements are real for patients.

We are pleased to note that the Department of Health has recognised this by:

- Starting to collect data on the total wait experienced by patients
- Setting a target for total waits of not more than four hours by 2004
- Funding the Emergency Care Collaborative to help deliver this
- Using the total wait time to award star ratings from next year.

## RESULTS FOR 24th FEBRUARY 2003

**31 CHCs** covered **35 hospitals** in London, Kent, Surrey, Sussex, Hertfordshire, Hampshire and Birmingham.

### LONGEST WAITS IN FEBRUARY

The longest trolley wait was at Royal Surrey County Hospital, where a 74-year-old female patient, who had come in feeling generally unwell, had waited for a bed for over 49 hours.

The second longest wait was at St Peter's hospital where an 85-year-old patient, who had had a fractured neck of femur, waited over 46 hours on a trolley. The third longest wait was at Royal Surrey County Hospital, where a 72-year-old man, suffering from shortness of breath had waited for a bed for more than 33 hours.

The longest Casualty bed waits, in an A & E department, was at Queen Elizabeth Hospital, where a 75-year-old man, who came in on the 23<sup>rd</sup> February suffering from confusion, had waited for a ward bed for over 39 hours.

At the same hospital, an 86-year-old man, suffering from congestive cardiac failure, had been waiting for a ward bed for 33.16 hours.

The third longest bed wait was at Kent and Sussex hospital where it was reported that an 89-year-old man with angina, had waited for almost 30 hours for a bed in a ward.

Throughout participating hospitals a total of 40 patients waited, from the 22<sup>nd</sup> February 2003, or 23<sup>rd</sup> February 2003, in Casualty Departments for periods of 16.36 hours up to 49.13 hours.

The total number of patients in A&E departments recorded in February was 825 of whom **59 (7.2%)** had waited ten hours or more. **33 (4%)** had waited for more than 20 hours.

The total number of patients who had waited four hours or more was **303 (36.7%)**.

### Over 70s

**30** people aged **70** and over had been in the Accident and Emergency departments in excess of **10 hours**, and of these **10** were on trolleys. (See table on page II and III)

## HOSPITAL NEWS ROUND UP

### Ashford Hospital

Casualty Watch visitors, D. Revie and G. Gilbert, from North West Surrey CHC, reported that it was a relatively light day for this time of year, with waiting time of 2-3 hours.

### Chase Farm Hospital

John Lindsy and Richard Reyland from Enfield CHC reported that there was a serious shortage of beds despite the fact that no wards were closed.

### Epsom Hospital

Alan Peace and Jean Griffiths, the visitors from Mid Surrey CHC, reported that there was a half hour wait for minor cases to be seen. They also reported that the A and E's x-ray department was not working to capacity, and thus patients had to go to other parts of the hospital. The medical assessment unit was not operative; beds were used on a ward to compensate.

### Maidstone Hospital

Robin Kenworthy and Alan Cocks, from Maidstone & Malling CHC, reported that there was a 'See and Treat' procedure in operation in the Accident & Emergency department. There were 4 ambulances outside and the department was short of one staff member.

### Medway, Maritime Hospital

Sue Hannant and Sheila Kearne, from Medway & Swale CHC, reported that the Medical Assessment Unit was closed due to the volume of patients. Patients were being admitted to the main Accident and Emergency.

### Royal Surrey County Hospital

Casualty Watch visitor, Dr. Noel Mowat, reported that the department was exceptionally busy during the visit. There were twelve patients still waiting after overnight stays, one of them had been in the department for two days. Meanwhile the situation was made worse by patients who had been admitted with infectious diarrhoea and vomiting. This resulted in the cubicles having to be closed and limited the number of patients the department could admit. The A and E manager had to contact the PCT and temporarily close the department.

### Worcester Royal Infirmary

Mark Lawly and Pauline Davis, from Kidderminster CHC, reported that the department was very busy and there were no beds available. There was no room for chest pain patients in the A and E or medical assessment unit.

## **INFORMATION RECEIVED FROM EMERGENCY BED SERVICE AND LONDON AMBULANCE SERVICE**

Information was received from the Emergency Bed Service (EBS) regarding restrictions in force and medically refereed cases; the report can be found on page VIII.

- The information received from the London Ambulance Service (LAS) stated that Chase Farm Hospital A&E diverted LAS to Barnet General Hospital from 13:30 – 15:00 hours on 24/02/03. There were no other diverts or closures.
