

A SNAPSHOT RECORD OF THE PATIENTS' TOTAL WAITING TIMES IN ACCIDENT AND EMERGENCY

The waiting time for patients in A & E department is made up of three elements:

1. Waiting to see the doctor in the first place.
2. Waiting for tests and assessment to be carried out for diagnosis
3. Waiting to go onto the ward after the doctor has decided the patient needs to be admitted to hospital.

Casualty Watch is a monthly snapshot of the total time spent by patients in A & E. The official data published by the Department of Health currently relates only to the third waiting period – the number of trolley waits over 12 hours. This data is used as one of the parameters to award Star Ratings to NHS Trusts. CHCs have long felt that the total wait for patients needs to be recorded. Unless the real experience of patients is used to judge the performance of the NHS, it is difficult to make sure improvements are real for patients.

We are pleased to note that the Department of Health has recognised this by:

- Starting to collect data on the total wait experienced by patients
- Setting a target for total waits of not more than four hours by 2004
- Funding the Emergency Care Collaborative to help deliver this
- Using the total wait time to award star ratings from next year.

Elizabeth Manero
CHAIR – LONDON HEALTH LINK

To: All Participating CHCs and other Colleagues concerned with Quality of Emergency Services

Subject: Casualty Watch for the 29th July 2002

From: Mary Arayo, Casualty Watch Co-ordinator

RESULTS FOR 29th JULY 2002

35 CHCs covered **38 hospitals** in London, Kent, Surrey, Sussex, Hertfordshire, Newcastle and Birmingham.

LONGEST WAITS IN JULY

The 3 longest trolley waits were all at the Royal Surrey County Hospital, where a 79-year-old male patient, who had suffered from a cerebro-vascular accident, was waiting for a bed. He had been on a trolley for over 38 hours. An 87-year-old male with a blocked urinary catheter had been waiting over 29 hours for admission and an 80-year-old male, who had collapsed, had been waiting over 25 hours for a bed.

The longest Casualty bed wait, in an A&E department, was at Maidstone Hospital, where Maidstone and Malling CHC reported that a 57-year-old male, with chest pain, had waited for 75 hours in a bed. At the same hospital a 55-year-old male, with a chicken pox, waited over 74.5 hours on a casualty bed. At St Peter's Hospital, Chertsey, a 78-year-old female, who had been having dizzy spells, was waiting to go to a private hospital for over 67 hours, whilst, at Maidstone Hospital, a 29-year-old male, was also waiting on a bed for admission, for over 67 hours.

The total number of patients in A&E departments recorded in July was **898** of whom **78 (8.6%)** had waited ten hours or more. **34 (3.79%)** people had waited for more than **20** hours.

The total number of patients who had waited four hours or more was **348 (38.75%)**.

Over 70s

40 people aged **70** and over had been in the Accident and Emergency departments in excess of **10 hours**, and of these **7** were on trolleys. (See table on page II and III)

HOSPITAL NEWS ROUND UP

Ashford Hospital, Middlesex

David Revie the North West Surrey CHC member reported that the waiting times were showing at 3-4 hours. The Medical Assessment Unit was still unable to admit and process suitable patients, so all admissions were through the A&E. It was "a light load" that Monday.

City Hospital, Birmingham

The casualty Watch visitor reported that the department was extremely busy due to a fire at Sandwell District General Hospital.

Epsom Hospital

Jane Howarth and Alan Peace, Casualty Watch visitors from Mid-Surrey CHC, reported that the department was not very busy.

Kings' College Hospital

Rhona Burchill of Southwark CHC reported that the Accident & Emergency department was very busy, primarily because of the number of 'red phone' casualties during the day. Staffing problems, some absences due to sickness, meant other "off duty" staff had been asked to cover.

Maidstone Hospital

Robin Kenworthy and Alan Cocks from Maidstone & Malling CHC reported that the hospital was on divert. 16 'diverts' had already occurred by 17.30, and still no available empty beds within the hospital. The "Observation Ward" was still being used as the Resuscitation area.

Newham Hospital

Jill Powell & Barbara Cudden from Newham CHC reported that the Accident & Emergency department was very busy reported. One of the reasons put forward was the inability to get GP appointments with local doctors.

Queen Elizabeth the Queen Mother Hospital

B. Cook from Canterbury & Thanet CHC reported that few patients were actually being seen, but there were 25 patients in the waiting room.

INFORMATION RECEIVED FROM EMERGENCY BED SERVICE AND LONDON AMBULANCE SERVICE

Information was received from the Emergency Bed Service (EBS) regarding restrictions in force and medically refereed cases; the report can be found on page IX.

The information received from the London Ambulance Service (LAS) stated hospitals being closed to 'blue light' ambulances for 29/07/02 were:

Oldchurch Hospital – pre-arranged closure from 00:00 – 16.30

King George's Hospital – ambulances diverted from 12.05 – 15.00
